(If applicable)

Membership List

Members' details are stored in the Society's databases in accordance with rules of the Data Protection Act. A printed membership list is produced about once a year and circulated to all members. The purpose of this list is so that members can contact each other for help and to discuss matters of interest. Although the circulation of this list is strictly limited to members, a few members, usually for reasons of security connected to their work, request that not all their details are included in the Membership List. If this applies to you, please give below details of which parts of your personal details you would like withheld.

When complete, please return this form, with a year's subscription (see "Joining" page for rates) and a stamped self-addressed envelope, to:-
